EDUCATION

TED University — B.S. Software Engineering & Secondary Field in Applied Data Analytics

Graduation: January 2026

EXPERIENCE

Software Engineer — ApyGuard February 2025 – Present

- Developed API security platform features using Next.js and Django for real-time vulnerability analysis and behavioral profiling.
- Built frontend interfaces for API discovery, OpenAPI analysis, and runtime monitoring workflows.
- Integrated Kafka-based event streaming pipelines to support scalable real-time API telemetry processing.
- Contributed to internal security tooling focused on OWASP API Security Top 10 detection and behavioral anomaly analysis.

Software Engineer Intern — ASELSAN August 2024 – September 2024

- Built real-time sensor tracking interfaces using React and Next.js for operational visualization workflows.
- Developed telemetry simulation services using C# and .NET for distributed sensor communication testing.
- Implemented WebSocket and Kafka-based live data streaming systems for low-latency communication.
- Worked with PostgreSQL-backed data pipelines to support high-frequency telemetry storage and retrieval.

Academic Researcher & Mobile Developer — Ankara Science University February 2024 – October 2024

- Developed React Native mobile applications for academic assistant and communication platforms.
- Built responsive Next.js web interfaces integrated with real-time chat and cloud-based backend services.
- Managed iOS and Android application builds, deployment pipelines, and API integrations.
- Collaborated on UI/UX improvements to enhance user accessibility and cross-platform consistency.

Software Engineer Intern — Optima Soft June 2023 – September 2023

- Contributed to the development of React Native mobile applications focused on ALPR workflows.
- Implemented reusable frontend components using JavaScript and TypeScript.
- Integrated backend API services and improved mobile application usability across platforms.

PROJECTS

ApyGuard Benchmarks & API Security Research

- Designed OWASP API Security benchmark scenarios covering BOLA, BFLA, SSRF, Mass Assignment, and API Misconfiguration cases for API security testing and developer education.

VS Code OpenAPI Analyzer

- Developed a source-code analyzer capable of extracting OpenAPI specifications from FastAPI, Flask, Express.js, and NestJS applications.

Chrome Extension API Discovery Tool

- Built a browser extension that captures API traffic and automatically generates structured API documentation baselines.

SKILLS

Languages: JavaScript, TypeScript, Python, Swift, SQL, C#

Frontend: React, Next.js, React Native, Tailwind CSS

Backend: Django, FastAPI, Spring Boot, Node.js

Infrastructure: Kafka, PostgreSQL, Docker, Git, Redis

Security & Tooling: API Security, OpenAPI, OWASP API Security, WebSockets

CERTIFICATIONS

- Meta — Programming with JavaScript
- IBM — Developing Front-End Apps with React
- Meta — Advanced Programming in Swift
